

SoloStack — Master Product Definition Document (MPDD)

1. Product Overview

Product Name

SoloStack

Product Category

Multi-tenant SaaS platform for freelancers and solo professionals.

Core Idea

SoloStack is an end-to-end business operating system for freelancers who already have clients and need a professional way to manage their business operations.

It is NOT:

- A freelancer marketplace
- A job-finding platform
- A banking app
- An accounting ERP for enterprises

It IS:

- A unified workspace for freelancers
 - A business management platform
 - A workflow operating system for solo professionals
 - A centralized back-office for freelance businesses
-

2. Problem Statement

Freelancers currently manage their business using disconnected tools and manual workflows.

Typical workflow today:

- Client communication on WhatsApp
- Proposals in Google Docs
- Contracts manually created
- Invoices in Word/Excel
- Payments through UPI links
- Files in Google Drive
- Time tracking missing or manual
- Finance tracking in spreadsheets

This creates:

- Payment delays
- Missed follow-ups
- Unprofessional client experience
- Lost documents
- Operational chaos
- Lack of financial visibility

There is no India-focused unified system designed specifically for freelancers and solo creators.

3. Vision Statement

To become the default operating system for freelancers and solo professionals in India and emerging markets.

SoloStack aims to simplify the entire freelance business lifecycle:

Client → Proposal → Contract → Work → Invoice → Payment → Finance Tracking

All managed from one platform.

4. Mission Statement

Help freelancers run their business professionally without needing multiple disconnected tools.

5. Target Audience

Primary Users

Independent freelancers and solo professionals.

Examples:

- Graphic designers
- Web developers
- Video editors
- Social media managers
- Copywriters
- Consultants
- No-code developers
- Marketing freelancers
- Photographers
- Small solo agencies

6. Ideal Customer Profile (ICP)

Primary ICP

Freelancers earning between ₹30,000 to ₹3,00,000 per month.

Characteristics:

- Already have clients
- Work independently or with very small teams
- Use WhatsApp heavily
- Mobile-first workflows
- Handle invoices manually
- Have payment collection issues
- Want a more professional workflow
- Cannot afford expensive enterprise SaaS tools

7. Core Product Philosophy

SoloStack should feel like:

- One workspace
- One login
- One client database
- One connected workflow

NOT:

- Five disconnected products
- Multiple dashboards
- Separate apps

All modules must share:

- Clients
 - Projects
 - Files
 - Notifications
 - Billing
 - Authentication
 - User activity
-

8. Product Modules

8.1 SoloStack Invoice

Purpose

Help freelancers create professional invoices and get paid faster.

Key Features

- Invoice creation
- GST support
- PDF invoice generation
- Razorpay payment links
- UPI payment support
- Payment tracking
- Auto reminders
- Recurring invoices
- Invoice status tracking
- Client-wise invoice history
- Email invoice sending
- WhatsApp invoice sharing

Primary User Pain Solved

Late payments and unprofessional invoicing.

8.2 SoloStack Contracts

Purpose

Help freelancers create proposals and legally protect their work.

Key Features

- Proposal generation
- Contract templates
- E-signature support
- Client signing links
- Contract status tracking
- PDF export
- Branded proposals
- Scope/timeline/price sections

Primary User Pain Solved

Freelancers working without contracts and getting payment disputes.

8.3 SoloStack Portal

Purpose

Provide a professional client workspace.

Key Features

- Project workspace
- File sharing
- Client deliverables
- Feedback collection
- Progress tracking
- Shared project links
- View-only client access
- Centralized communication

Primary User Pain Solved

Scattered communication and unorganized project delivery.

8.4 SoloStack Time

Purpose

Track work hours and project profitability.

Key Features

- Time tracking
- Project-wise hours
- Billable hours
- Productivity reports
- Time-to-invoice conversion
- Profitability analytics

Primary User Pain Solved

Manual or missing work-hour tracking.

8.5 SoloStack Pulse

Purpose

Provide finance visibility for freelancers.

Key Features

- Income tracking
- Expense tracking
- Client-wise revenue analytics
- Pending payments
- Monthly financial summaries
- Estimated tax insights
- Revenue dashboard

Primary User Pain Solved

Lack of financial clarity.

9. Core Shared Systems

9.1 Authentication System

Features

- Email/password login
- Google OAuth login
- JWT session handling
- Password reset
- Email verification
- Session management

Shared Across

All modules.

9.2 Shared Client Database

Purpose

Single source of truth for all clients.

Client Fields

- Name
- Email
- Phone number
- Company name
- GST number
- Address
- Notes

Shared Usage

All modules pull data from this same client database.

9.3 Shared Project System

Purpose

Projects become the central operational entity.

Relationships

- One client can have multiple projects
- One project can contain:
 - invoices
 - contracts
 - files
 - time entries
 - communication

Importance

This connects all modules into one workflow.

9.4 Notification Engine

Channels

- Email
- WhatsApp (future)
- In-app notifications

Use Cases

- Invoice reminders
 - Contract signing reminders
 - Payment confirmations
 - Portal updates
-

9.5 File Storage System

Purpose

Centralized storage for:

- PDFs
- Contracts

- Deliverables
 - Assets
 - Client files
-

10. User Workflow

End-to-End Freelance Workflow

Step 1 — Client Acquisition

Freelancer gets clients externally.

Examples:

- Upwork
- LinkedIn
- Instagram
- Referrals
- Networking

SoloStack is NOT involved in finding clients.

Step 2 — Proposal Creation

Freelancer creates a professional proposal using SoloStack Contracts.

Step 3 — Contract Signing

Client signs digitally.

Step 4 — Project Execution

Freelancer manages files, deliverables, and progress inside SoloStack Portal.

Step 5 — Time Tracking

Freelancer tracks hours using SoloStack Time.

Step 6 — Invoicing

Freelancer sends invoice using SoloStack Invoice.

Step 7 — Payment Collection

Client pays through Razorpay/UPI link.

Step 8 — Financial Tracking

Income and analytics appear inside SoloStack Pulse.

11. Technical Architecture

Frontend Stack

Technologies

- Next.js
- React
- TypeScript
- Tailwind CSS
- shadcn/ui

Purpose

- Responsive UI
 - Fast performance
 - Mobile-first experience
 - Single frontend codebase
-

Backend Stack

Core Backend

- Supabase
- PostgreSQL
- Supabase Auth
- Supabase Storage
- Supabase Realtime
- Edge Functions (if required)

Additional Services

- Razorpay
 - Brevo (emails)
 - Vercel hosting
 - GitHub repository management
-

12. Database Design Philosophy

Multi-Tenant Architecture

Approach

Single shared database with row-level isolation.

Structure

Each table contains:

- user_id

All queries automatically filter by authenticated user.

Benefits

- Scalable
 - Cost-efficient
 - Easier maintenance
 - Faster development
-

13. Hosting & Infrastructure

Initial Infrastructure

Frontend Hosting

Vercel

Backend & Database

Supabase

Emails

Brevo

Payments

Razorpay

Version Control

GitHub

Expected Initial Cost

Near zero during MVP phase.

14. Revenue Model

Freemium Model

Free Plan

Limited usage.

Examples:

- Limited invoices
 - Basic branding
 - Limited contracts
-

Paid Plans

Example Pricing

Invoice:

- ₹299/month
- ₹2499/year

Contracts:

- ₹249/month
- ₹1999/year

Portal:

- ₹349/month
- ₹2999/year

Time:

- ₹199/month
- ₹1699/year

Pulse:

- ₹199/month
 - ₹1699/year
-

Pro Bundle

All products together.

Estimated:

- ₹999/month
 - ₹7999/year
-

15. Product Positioning

Positioning Statement

SoloStack helps freelancers run their business professionally after they get clients.

Key Positioning Differences

NOT:

- Upwork
- Fiverr
- Freelancer marketplaces

IS:

- Business operating system
 - Freelancer workspace
 - Freelance back-office platform
-

16. Competitor Analysis

Direct/Indirect Competitors

International

- HoneyBook
- Bonsai
- FreshBooks
- QuickBooks
- Notion
- Calendly

Local Alternatives

- Manual workflows

- Google Docs
 - Excel
 - WhatsApp
 - Razorpay links
-

17. Key Competitive Advantages

India-Focused

- UPI-first
 - Razorpay integration
 - Mobile-first
 - WhatsApp workflow understanding
 - Affordable pricing
-

Unified Workflow

Data entered once flows across all modules.

Example:

- Client added once
 - Used in contracts, invoices, projects, analytics
-

Simplicity

Designed specifically for solo professionals.

Not enterprise-focused.

18. MVP Scope

MVP Goal

Validate whether freelancers will pay for streamlined invoicing and payment workflows.

MVP Features

Included

- Authentication

- Client management
 - Invoice generation
 - PDF invoices
 - Razorpay payment links
 - Invoice tracking
 - Email reminders
 - Dashboard
-

Excluded Initially

- AI features
 - Team collaboration
 - Advanced analytics
 - Complex automations
 - Native mobile apps
 - Advanced portals
 - Deep accounting features
-

19. Development Phases

Phase 1 — Foundation

Deliverables

- Auth system
 - Shared database structure
 - User management
 - Client management
 - Subscription system
-

Phase 2 — Invoice MVP

Deliverables

- Invoice CRUD
 - PDF generation
 - Razorpay integration
 - Email sending
 - Invoice reminders
-

Phase 3 — Contracts

Deliverables

- Proposal builder
 - Contract templates
 - E-signatures
 - PDF exports
-

Phase 4 — Portal

Deliverables

- Project workspaces
 - File sharing
 - Client access
 - Deliverable management
-

Phase 5 — Time & Pulse

Deliverables

- Time tracking
 - Revenue analytics
 - Finance dashboard
 - Profitability insights
-

20. User Experience Principles

UX Goals

- Extremely simple
 - Mobile-friendly
 - Fast workflows
 - Minimal learning curve
 - Professional appearance
 - Low cognitive load
-

Design Principles

- Minimal UI
- No enterprise complexity
- Dark/light mode support
- Fast invoice generation

- One-click workflows
 - Clear status indicators
-

21. Security Requirements

Requirements

- Secure authentication
 - Row-level database security
 - Encrypted passwords
 - Secure payment integrations
 - HTTPS-only deployment
 - Protected file access
-

22. Scalability Goals

Initial Scale

Support:

- 100–1000 freelancers
-

Future Scale

Support:

- Thousands of freelancers
 - High invoice volumes
 - Large file storage
 - Real-time workflows
-

23. Success Metrics

Product Metrics

- Number of active freelancers
 - Monthly recurring revenue (MRR)
 - Number of invoices generated
 - Invoice payment success rate
 - User retention
 - Daily active users
-

Business Metrics

- Paid conversion rate
 - Average revenue per user
 - Churn rate
 - Referral growth
-

24. Long-Term Expansion Possibilities

Potential future features:

- AI proposal generation
 - AI invoice follow-ups
 - Mobile apps
 - Team collaboration
 - Tax filing integrations
 - Accounting integrations
 - CRM functionality
 - Automated workflows
 - Client communication hub
 - White-label portals
-

25. Final Product Summary

SoloStack is a modular SaaS platform designed specifically for freelancers and solo professionals.

Its purpose is to unify the entire freelance business workflow into one connected system.

Instead of using multiple disconnected tools, freelancers can:

- manage clients,
- create proposals,
- sign contracts,
- share work,
- track time,
- send invoices,
- collect payments,
- monitor finances,

all from one platform.

The platform prioritizes:

- simplicity,
- affordability,
- mobile-first workflows,

- Indian payment systems,
- freelancer-specific workflows,
- operational clarity.

SoloStack is positioned as the business operating system for freelancers — not a marketplace for finding work.
